

GULF COAST PLUMBING, HEATING & COOLING ASSOCIATION

Volunteer Response Team

The Gulf Coast PHCC has formed an “Volunteer Response Team” was designed to respond to a local community disaster or other unsafe/unhealthy plumbing, heating, or air conditioning issue of an elderly individual or less fortunate one with no resources to deal with the issue. All cases must be recognized by the local media, public works, health department or other similar sources and then the response team will consider its action.

We are asking for your help to commit to this cause by making someone in your company the designated contact person, and if needed commit your expertise to the team.

Volunteer Response Team Form

CONTACT NAME: _____

COMPANY: _____

ADDRESS: _____
